

ODESKABEL – connecting people at the speed of light

1932 – ELEKTROKABEL Plant was created on the basis of several private workshops
1949 – State cable workshops are organised for production cables and wires – the year of ODESKABEL's birth
1960s – The plant is specialising on the output of urban telecommunication cables
1972 – Starting NOKIA automatic phone conductors production lines
Late 70s – Mastering serial output of urban telephone cables with the number of pairs up to 2400 inclusive
1987 – Starting NOKIA ATKT-100 fully automated complex
1990 – Starting workshop for production fiber optical cables on the basis of NOKIA-MAILEFFER equipment
1996 – The plant is reorganized into an open joint stock company, beginning of privatization
1999 – ODESKABEL Plant introduced and started applying ISO 9002 Quality Control System
2000 – ODESKABEL OJSC is a fully non-state enterprise

Dmitriy Iorgachev
Chairman of the Board – General Director

ODESKABEL's production range

Telephone cables

The experience of producing telephone cables counts several decades.

ODESKABEL Plant is equipped with an automated complex for telephone cables production.

Telephone cables form about 70 % of the total ODESKABEL's output.

Optical communication cables

Fiber optical cables have been produced for 15 years already, since 1999, in the ISO 9002 Quality Control System, now with the total number of fibers up to 144.

International level and quality of fiber optical cables of the plant were confirmed by successful certificate tests in Sumitomo Electric (Japan) and Bell (USA) Laboratories.

The main consumers of fiber optical cables in Ukraine are UKRTELECOM, oil-gas complex enterprises and private companies.

Cables, cords, wires

Are used in: electrical units for installation of electrical equipment, machines and mechanisms, in construction, common radio-electric equipment, transmission and reception antennas connecting, signalling systems.

**Partner from Ukraine****Markets**

In the very beginning of creating, a goal was set before the plant: always to correspond with up-to-date standards, to work out themselves or purchase from competent developers in their field advanced technologies for producing cables and wires.

Today the main suppliers of materials for ODESKABEL are companies from the USA, Japan, France, Russia and Switzerland. The plant delivers its products to many CIS countries (besides Ukraine): Russia, Belarus, Kazakhstan, Moldova, Georgia and Azerbaijan.

In 1999 ODESKABEL's output reached \$8.5 millions, and for 9 months of 2000 – \$13.8 millions.

During many years ODESKABEL has been a member of the International Cable-makers Federation ICF, (Austria).

ODESKABEL OJSC invites all interested people to mutually beneficial cooperation.
